

## NASA SMD EDUCATION PRODUCT REVIEW

### Fall 2014 – Summer 2015 Call for Products and Review Schedule

On behalf of NASA, the Institute for Global Environmental Strategies (IGES) convenes panels of educators and scientists to review new NASA Earth and space science education products. This review is a requirement for posting materials on the NASA Wavelength Database ([nasawavelength.org](http://nasawavelength.org)). The review is held on a quarterly basis. The following table shows the upcoming schedule and deadlines.

Please note: There may be cases when there is a time critical requirement to complete a review before the next scheduled deadline. If this is the case, please contact IGES at [nasareviews@strategies.org](mailto:nasareviews@strategies.org) as soon as possible to discuss a possible out-of-cycle review.

Review Cycle	Notice of Intent to Submit*	Products to IGES by:	Review Results to Developers:
Fall 2014	Sept 15	Oct 6	Dec 19
Winter 2015	Dec. 16	Jan. 20	March 30
Spring 2015	March 16	April 13	June 19
Summer 2015	June 1	June 29	Sept 14
Fall 2015	TBA	TBA	TBA

\* Providing a Notice of Intent is optional, but strongly encouraged.

### Eligible Products

The education product review is limited to Earth and space science education products sponsored by NASA. Products are included for all levels (elementary-college) of both formal and informal education. Review panels are established based on the subject matter and target audience of the products submitted.

This review process does not take the place of a formative evaluation of education materials. Before entering the review, products should have already gone through an appropriate formative evaluation, including field-testing, and review by scientists/subject matter experts for scientific/technical accuracy.

Products submitted for this review are not expected to be in final format – design and conformance to NASA publications style guide may be addressed after the science and education content review. Reviewers are instructed to look beyond formatting and design, and focus on content and pedagogy.

### Notice of Intent

Product developers are requested to provide a “Notice of Intent” that they plan to submit a product to the review. This is optional, but strongly encouraged. Having this information helps IGES plan appropriate review panels and expedite the review process. The “Notice of Intent” can

be sent in at any time, for any future review cycle. Please provide the following information to [nasareviews@strategies.org](mailto:nasareviews@strategies.org):

- Name
- Organization
- NASA SMD Division(s): Astrophysics, Earth Science, Heliophysics or Planetary Science
- Product Title
- Primary Audience and Targeted Grade Level
- Subject
- Approximate length (in pages, as found in a typical textbook).
- Format (e.g., Web, poster, lithograph, PDF, etc.)
- Please list the sponsor/funding source (SMD EPOESS, Mission E/PO, etc.).
- Review cycle (Winter 2015, Spring 2015, Summer 2015, or Fall 2015).

**How to Submit a Product:**

As of 2007, there is only one review process for Earth and space science education materials. As of August 2009, the process has moved to a new Web-based system. While the general process remains the same, it may require some adjustments. Specific instructions, guidelines for product developers, and review criteria are all updated and available at <http://nasareviews.strategies.org> .

If you have a physical product to review (and you can't distribute it electronically or prefer not to) please send ten (10) copies to:

IGES

c/o John Ensworth

507 Cherrywood Dr.

Longmont CO 80504

**Questions/More Information**

For more information about the review, contact IGES at [nasareviews@strategies.org](mailto:nasareviews@strategies.org).
